Professional Experience

HYR Global Source Inc

Jan 2026 – Present

ServiceNow Developer

- Designed and enhanced ServiceNow Demand intake processes, implementing custom forms, approvals, and financial tracking to streamline project request submissions and improve data accuracy.
- Configured custom playbooks, approval rules, and approval sequences in ServiceNow Sourcing and Procurement, and developed executive-level notifications to support procurement governance and leadership visibility.
- Automated the SOX audit intake and tracking process in ServiceNow by collaborating with cross-functional teams including Network and Security, improving audit request handling and creating a more seamless user experience.

RSC Solutions

Feb 2025 – Jan 2026

ServiceNow Developer

- Automated Zoom email updates by integrating ServiceNow with Zoom's REST API using a custom Flow Designer HTTP action, eliminating 100% of manual effort and reducing update time from hours to <30 seconds for 2,000+ user updates annually.
- Built a multi-page Custom Workspace in UI Builder by implementing dynamic pages, agent views, custom viewports, client scripts, data resources, and event mapping to enhance workflow efficiency.
- Designed and launched a customized Walk-up Experience for the Tech Lounge, improving queue and appointment management and enabling seamless appointment booking through Employee Center.
- Led instance management and upgrades, including scheduled production-to-sub-prod clones and a successful upgrade to ServiceNow Yokohama, ensuring platform stability and feature adoption.
- Developed a fully interactive Outlook Actionable Message (OAM) survey framework using custom Adaptive Card JSON, Base64-branded assets, emoji-based rating inputs, and Flow Designer integrations to enable real-time in-email survey submissions.

Work4Flow

Nov 2024 – Feb 2025

Senior Software Engineer

- Designed and developed over 4 Agent AI Skills within the ITSM domain, including the "Skill Kit - Prompt Evaluator" and "Prompt Enhancer," which streamlined and optimized task workflows, resulting in a 60% improvement in user efficiency and productivity through tailored AI-driven solutions.
- Developed and implemented inventory mapping for an external system, integrating data from an Apache Kafka server into ServiceNow using Script Includes, which improved data processing efficiency by 75% and streamlined inventory management workflows.
- Designed and implemented a custom Virtual Agent topic for password reset in the CSM module using GenAI integration, enabling multi-turn Q&A and seamless integration with chat APIs like OpenAI, Gemini, and Claude.
- Automated the knowledge article creation process, reducing manual effort by 80%, and ensured efficient review and publishing workflows with email notifications for approval updates.
- Developed and managed a reliable CMDB by leveraging automated Discovery and Service Mapping, achieving a 98% data accuracy rate and improving asset and configuration management efficiency.

Games For Love

Sept 2024 – Nov 2025

Software Engineer

- Learned and applied **Unity game development fundamentals**, including scripting, scene management, and gameplay mechanics, through hands-on training and guided projects.
- Collaborated with a team of interns to **design and develop a game prototype**, participating in planning, implementation, and iterative testing.

New York City Department of Sanitation, Manhattan, New York City
ServiceNow Developer

July 2023 – Sept 2024

- Developed an automated Incident Management system in ServiceNow to streamline the ticketing process for IT support, reducing manual intervention and improving response times by 35%, aligning with ITSM best practices.
- Configured automated email notifications and task alerts using Notification Rules and Email Scripts in ServiceNow ITSM to keep users and IT teams informed of incident status changes, leading to a 15% increase in resolution time efficiency.
- Implemented a Service Catalog for ITAM under ITSM/CSM to automate the process of placing requests for IT assets using Flow Designer, decreasing processing time by 98%, and designed a dedicated Service Portal for improved user experience.
- Built ServiceNow forms from scratch, including advanced customizations at the level of UI Macros/UI Pages.
- Exported data to the Microsoft SQL Server from the ServiceNow production instance via a mid-server, employing Export Sets and creating export definitions with specified fields and filter conditions to maintain the integrity of CMDB records.
- Designed and developed custom Performance Analytics dashboards in ServiceNow ITSM for the BIT team, significantly improving budgeting and inventory planning processes by providing real-time insights into existing inventory, streamlining procurement operations, and reducing manual effort by 30%.
- Built a Service Portal for ITAM from scratch using Service Portal configuration tools, including Branding Editor, Page Editor, and Widget Editor, delivering the solution within six weeks and improving user engagement by 40%, while aligning with CSM goals and streamlining IT asset management processes.

Futuretech Bizsoft LLP, Mumbai, India
Software Developer

June 2020 – July 2022

- Designed and implemented Service Catalogs and Knowledge Base workflows using ServiceNow Workflow Editor, improving documentation processes and reducing request fulfillment times by 25%.
- Configured and managed over 30 ServiceNow REST integrations, automating ITSM processes and reducing manual intervention, resulting in a 30% improvement in resolution times and a 20% decrease in errors.
- Built and maintained core ServiceNow modules, including Incident, Problem, and Change Management, handling over 1,000 tickets monthly and ensuring 99.5% SLA compliance through ITIL best practices.
- Developed and customized 10+ Service Portals using ServiceNow Page and Widget Editors to meet CSM team requirements, improving self-service adoption rates by 40%.
- Collaborated with cross-functional teams using Agile methodologies to deliver 20+ application updates in ITSM and CSM, achieving a 95% on-time delivery rate and reducing post-deployment issues by 15%.
- Optimized scheduled jobs in ServiceNow by analyzing system performance and refining scripts, resulting in a 20% reduction in processing time and improved overall system reliability for ITSM and CMDB functionalities.
- Implemented an automated email notification system for ServiceNow workflow approvals in ITSM processes, reducing approval delays by 35% and increasing process efficiency across teams.

CATKing Educare
Business Development Executive

Mumbai, India
June 2019 – Jan 2020

- Management and deployment of the social media campaign over Facebook, YouTube, Google, and Instagram improving CTR by 38%.

Hackathon

Winner of Morgan Stanley Code to Give Hackathon

20 April 2023 - 26 April 2023

- Restructured food distribution platform for Atlanta Food Bank. Composed prototype on Figma and Frontend for the website using React JS, securing 1st Place in the Hackathon. **LEADERSHIP**

Leadership

Computer Engineering Student's Society, General Secretary

August 2018 – May 2019

- Successfully conducted 5 hands-on workshops on the latest technology like Artificial Intelligence, Ethical Hacking, Python and Web development also lead a team of 12 for 3 newsletter publications TURING

Education

Master of Science, Computer Science	May 2024
Pace University, Seidenberg School of Computer Science and Information Systems	
Bachelor of Engineering, Computer Engineering	May 2019
Rajiv Gandhi Institute of Technology, Mumbai, India	

Technical Skills

ServiceNow: ITSM, Business Rules, Client Scripts, UI Policies, UI Actions, Access Control Lists, Flow Designer, Automated Test Framework (ATF), UI Builder, Performance Analytics Dashboards, Workflows.
ML/AI: LangChain, Prompt engineering, OpenAI, AWS Bedrock, Claude, LLaMa.
Frontend: ReactJS, NextJS, Flutter, HTML, CSS, Tailwind CSS, Figma
Backend: JavaScript, TypeScript, NodeJS, ExpressJS, MongoDB, MySQL, MSSQL

Certifications - ServiceNow

- Certified System Administrator
- Now Assist Executive Micro Certificate
- Micro-Certification - Virtual Agent
- Now Assist for Creator Implementation Bootcamp Accreditation
- Micro-Certification – Performance Analytics
- Micro-Certification - Flow Designer
- Micro-Certification - Integration Hub
- Micro-Certification - Agile Development Fundamen
